Complements for architecture

- Domestic architecture
- Industrial architecture
- Public and commercial architecture

Our showroom in Fossombrone, Italy, is dedicated to introducing our clients to the GIOMMI world, to explore ideas and their feasibility, to work together in evaluating visions and plans, always with a focus on low environmental impact and respect for our planet. The exhibition hall has been conceived to display our complete range of products, including those designed by GIOMMI, and our selection of articles and proposals from the best brands. Inspiration, creativity, technical solutions gather in our showroom to meet materials and style of the best quality.

Origins

Since 1961, Complementing Architecture with high technology and respect for the environment. The fruit of constant engagement and professional commitment in projecting, producing, installing high-technology, top-class design and quality products for building, architecture, art and landscaping: long-term experience, management and organization, prepared young staff, the most modern technology, quality materials, control of procedures and final products, quest of sustainable solutions for reduced environmental impact; passion for excellence, with a keen person-oriented approach. GIOMMI began in 1961 working with metal and noble materials, targeting architecture and arts to produce high-technology eco-friendly building components.

The company grew through three generations, with new creative services to its clients, interpreting and reconciling ideas, needs, functionality and competence, as well as exploring futuristic technical solutions. Such growth goes on, making GIOMMI an enterprise fitted to compete at global level, and recognized within the market for its quality and forward vision. Achieving goals is the fruit of deep interest, constant engagement and professional commitment towards our work and according to clear guidelines:

- use of the best materials, chosen upon our experience in the field
- efficient internal organization, supported by the most modern technology and assisted by dynamic and skilled staff
- regular control of procedures and final products
- respect for the environment and constant reference to sustainable solutions with low environmental impact
- great passion and striving for excellence

50-year experience projecting and producing high-technology, quality and design solutions to complement bio-architecture for public, commercial, industrial, residential and indoors context with key-in-hand by-measure on-demand projects, adopting low-environmental impact criteria, creating installations and stands for exhibits and fairs as well as for the art world, using materials in harmony with the most sophisticated requirements: glass, wood, copper, stainless steel, aluminum, iron, bronze, corten. Our works are to remain in time and space, guarantee energy efficiency and environmental respect, and we are a partner in architectural projects with alternative and forward-looking character, eco-friendliness, creativity, technology and specialized installations, for any architectural idea.

Complementing industrial Architecture

We work with industrial plants and establishments using a broad range of solutions such as curtain walls, coverings and frames, electronic and armored/security fixtures, sliding and concealed/flush-to-wall fittings for interiors and exteriors, fire-rated and blast-resistant solutions, all with attention to low environmental impact. Professional skills enabling diversified targets, focusing on the client's needs and the will to obtain personalized, tailored interventions.

4

Complementing domestic Architecture

Our desire to create works that last a lifetime, at the same time guaranteeing energy efficiency and respect for the environment, makes us a valuable partner in architectural projects that are alternative and avant-garde. GIOMMI proposes high-quality design complements and high-functionality plants, in particular with the provision of the newest applications and devices in home and building automation (domotic systems).

12

Complementing public and commercial Architecture

With the power of experience and technology, we work side-by-side with architects and project designers to create solutions and systems that complement and enhance construction works, from installing systems to erecting coverings, including components such as fireproof systems. With our partners in the photovoltaic sector, we develop integrated installations to fit within the structural architecture, resulting in an appropriate visual and volume effect. We are also operating in infrastructures, realizing special public areas such as waiting lounges and halls in airports and stations.

16

Exhibit installations and services

Temporary and permanent solutions for fairs and exhibits represent one of the most challenging bricks in our wall, a stimulating environment in which our intervention covers from the concept up to the final completion. Adaptability meets variety in the use of materials – opening up to all possibilities – and the attention to eco-friendly solutions, allowing the most diversified types of installations (booths, stalls, stands, open-space), producing results of great impact, efficiency, environmental respect, as well as great prestige for the client's image.

26

After hour & Events

GIOMMI's management holds a personal commitment towards promoting culture and events aimed at circulating ideas, fostering learning, personal growth and collective progress. Over the years, numerous happenings have been organized, sometimes improvising out of casual encounters with artists and performance professionals from the world of art, culture and civic engagement, with a view to creating occasions to share, discuss, develop. Courses, projection of movies with debate, concerts, and musical and culinary evenings with international flavor have animated the locals of the establishment in Fossombrone and the splendid terrace facing the hills of the region.

28

“GIOMMI’S SCULPTURE” works of art

A passionate love for art, culture and decoration, the application of creative stimuli, the wish to contribute to enhancing our surroundings, integrating our actions into the environment in a respectful and sustainable manner, all feed GIOMMI’s artistic vein. A solid collaboration with art studios and local administrations has brought about the realization of celebrative sculptures in various public spaces of the region. A creative vein that marries fantasy, love for nature and the skills of gifted artists, at the service of our community.
